GYEON INFINITE WARRANTY

THE BENEFITS OF CERAMIC COATINGS

GYEON high end ceramic coatings applied by highly skilled professional detailers will guarantee outstanding visual results and long lasting protection.

GYEON coatings are very glossy and enhance the intensity of the paint, but what is most important, they ensure maximum protection on all surfaces of your vehicle. It will collect dirt and contamination much slower. The regular maintenance becomes much easier, due to the slickness of the paint. Coatings protect against UV rays and harsh chemicals, preventing oxidation and dullness.

Gloss retention

Protection against UV damage

Protects against the elements

Self-cleaning properties

Water repellency
